Learn Search Program :-

```
#include <stdio.h>

int main()
{
    int a[100], n, key, i;

    // Read number of elements
    printf("Enter number of elements:");
    scanf("%d", &n);

    // input array elements using for loop.
    printf("Enter %d elements : \n", n);
    for (i = 0; i < n; i++)
    {
        scanf("%d", &a[i]);
    }

    // input search element
    printf("Enter element to search:");
    scanf("%d", &key);

    // Linear Search using while loop & if
    i = 0;
    while (i < n)
    {
        if (a[i] == key)
        {
            printf("element found at position %d",
                i + 1);
        }
    }
}
```

```

return 0;
}
i++;
}
printf ("element not found");
return 0;
}

```

input :-

Enter number of elements : 5

Enter 5 elements :
 10
 20
 30
 40
 50

Enter element to search : 40

output :-

Element found at position 4.

Good
